

Buying a shed has never been easier with our step by step checklist

STEP 1 – Consideration & Planning

Great first step by requesting a Best Sheds quote! Your shed will last 20+ years, so it's important to make sure it's meeting your every need. Our trained salespeople can assist you with considering your exact needs and will customize a solution for you. Things to be sure of include:

- Roller Door Opening Heights.
- Room for future Storage Needs.
- Have you consider insulation? It's amazing the difference in comfort it makes inside a shed.

Obviously during this stage you need to compare the market and make sure you are getting the best possible value. Best Sheds encourages this and offers our exclusive 20% Best Price Guarantee* - where we promise to beat any comparable shed prices by 20%.

To assist with your full project budgeting, we can put you in touch with local builders who have experience in building our sheds. By dealing directly with the builder, you remove the middle man again, saving you on the total project cost. Other shed companies charge up to 25% of the total project cost - to project manage your relatively simple build.

During this stage be sure to consider our "Comparing Quotes? Watch out for these tricks" section outlined below.

STEP 2 – Plans & Approval

Once you've decided on Best Sheds as your shed supplier, site specific structural plans can be secured for a \$500 deposit – and are generally available immediately.

Following this, if your Shed requires council approval you'll need to submit the appropriate applications. Depending on your location we have a number of parties that can assist you with this process.

STEP 3 – Contract and Ordering

To confirm your order, we'll provide you a clear contract outlining exactly what you'll be receiving that will also outline payment terms.

STEP 4 – Manufacture and Delivery

Prior to manufacture your delivery date will be booked in and confirmed by our Australian operations and logistics team. Your shed will then be manufactured at our dedicated Australian Manufacturing facility and delivered in full - as one delivery. (Often other companies will take up to 6 deliveries to deliver a full shed kit – wasting your valuable time.)

STEP 5 - Build

A builder of your choice erects your shed to your timeline – you're in control of the process. We provide direct telephone support to assist with the process.

STEP 6 – Warranty Registration

Some companies require you to register for warranty support – with a third party cladding provider. With Best Sheds you're automatically registered for our 20 year Best Sheds warranty.

STEP 7 – Send us a photo of your shed

We'd love to hear about your experience with us and see the final result. Send us a photo of your shed.

We understand price is important and we've designed our business with that in mind - allowing us to pass on the big savings to you!

You're automatically registered for our 20 year Best Sheds warranty. Giving you peace of mind that you're buying a quality shed.

All your shed components will be delivered in the one delivery. Our promise to you!

We guarantee to be at least 20% cheaper on comparable shed prices - or we'll make up the 20% difference with a further discount*
